

## **T90 Series, 30A PCB Relay**

- 30A, 1 form A (NO); 20A, 1 form C (CO)
- Available as open frame or sealed construction
- Meets UL 508 and 873 Spacing 3.18 through air, 6.36 over surface
- UL class F insulation system standard

Typical applications HVAC, Appliances, Industrial Controls.

# All figures are given for coil without preenergization, at ambient temperature +23°C.

Ambient temperature vs. coil voltage - 1W coil

Data graphed above are average values and should be verified in application. Tests were conducted within a 2' (.6m) cube (still air); at nominal coil power @ 25°C; with normally open contact loaded; and with 4' (1.22m) long, #10AWG load wires. P.C. board relays were mounted to a 30A, single side P.C. board. Coll rise test conducted with a 30A PC board to maintain 20°C max. rise at 30°C. The relay connections and wiring must be designed with an adequate cross section to ensure proper current flow and heat dissipation. After cleaning process knock-off nib should be removed for optimum life of wash-tight relays.

## Accessory

2

Optional plastic dust cover is a snap-on unit, open on the PC board side of the relay. The cover, when ordered with the relay, is shipped separately. It is designed to be snapped into place by the customer after the relay has been assembled to the PC board.
